Address Line 1: 706 BROADWAY STREET

Address Line 2:

City: LOWELLZIP/Postal Code: 01854State: MACounty or Similar Division: MIDDLESEX

General Findings

Provide a summary of your past year's routine facility inspection documentation (see Part 3.1.2 of the permit). In addition, if you are an operator of an airport facility (Sector S) that is subject to the airport effluent limitations guidelines, and are complying with the MSGP Part 8.S.8.1 effluent limitation through the use of non-urea-containing deicers, provide a statement certifying that you do not use pavement deicers containing urea (e.g., "Urea was not used at [name of airport] for pavement deicing in the past year and will also not be used in 2015." (Note: Operators of airport facilities that are complying with Part 8.S.8.1 by meeting the numeric effluent limitation for ammonia do not need to include this statement.)

Since issuance of the MSGP #MAR054014 in June, three quarterly routine facility inspections occurred by the Operations Manager, a SWPPP Team member. All potential pollutant sources and industrial activity areas subject to exposure to storm water were found to have adequate controls.

Provide a summary of your past year's quarterly visual assessment documentation (see Part 3.2.2 of the permit).

The facility is relatively new and has not yet completed construction of all elements of the Storm Water Pollution Prevention Plan which calls for the samples for the visual assessments to be taken at a catch basin. The catch basin outfall has yet to be constructed. Therefore no visual assessment has been documented. The Storm Water Construction Permit remains active.

For any four-sample (minimum) average benchmark monitoring exceedance, if after reviewing the selection, design, installation, and implementation of your control measures and considering whether any modifications are necessary to meet the effluent limits in the permit, you determine that no further pollutant reductions are technologically available and economically practicable and achievable in light of best industry practice, provide your rationale for why you believe no further reductions are achievable (see Part 6.2.1.2 of the permit). Enter "NA" if not applicable.

The facility is relatively new and has not yet completed construction of a storm water catch basin. The Storm Water Pollution Prevention Plan calls for the samples for the benchmark monitoring to be taken at the catch basin. Therefore no benchmark monitoring has been documented. The Storm Water Construction Permit remains active.

Provide a summary of your past year's corrective action documentation (See Part 4.4 of the permit). (Note: If corrective action is not yet completed at the time of submission of this annual report, you must describe the status of any outstanding corrective action(s).) Also describe any incidents of noncompliance in the past year or currently ongoing, or if none, provide a statement that you are in compliance with the permit.

No corrective actions due to the discharge of pollutants were necessary. Best management practices were in place. No spills or leaks were detected. Since the facility has not fully implemented the quarterly visual inspections and quarterly benchmark monitoring, the facility is in noncompliance. Both these requirements will be met in the first quarter of 2018.

Certification Information

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I have no personal knowledge that the information submitted is other than true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
